

Activity #5 : JComboBox & Activity #6 : JList

Create a program that will display the below output:

- A. **JFrame** - must have a displayed text "Cart"
 - o **Community Pantry** frame will be the one which will appear first. If the user select, **Donor** then the **Donor** frame will be prompted same with the **Receiver** frame.
- B. **JLabel** – just a label to display text.
- C. **JComboBox** – will display elements of **Donor** and **Receiver**
 - o If **Donor** was selected, **Donor** frame will appear.
 - o If **Receiver** was selected, **Receiver** frame will appear.
- D. **JList** – a disabled list that contains multiple elements (minimum of 6 elements).
- E. **JList** – a enabled list that contains other elements (minimum of 6 elements). A user must select an element here.
- F. **JButton** – a button that will add items to the **Food Pantry** list from what is selected in **My Items** list. Then the selected element must remove to the **My Items** list (vise versa from **Receiver** frame).
- G. **JButton** – a button that will add items to the **Food Pantry** list from what is inputted in the textfield.
- H. **TextField** - a textfield that will accept user input and that input will be added on the list once the **Add** button was clicked.
- I. **TextField** - a disabled textfield that will display how many times the user get an item from the **Food Pantry** List. Each click of the button, additional to the item count but make sure that **there is an element that is being selected from the list**.
